Art Unit: 1644

1. Claims 18-30, 32, 35-47, 49 and 52-57 are pending.
2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6-20-05 has been entered.
3. Claims 24, 30, 32, 41-47 and 49 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the Paper received 10-24-03.
4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
5. Claims 18-23, 25-29, 35-40 and 52-57 stand rejected under 35 U.S.C. 102(b) as being anticipated by Torii et al, as evidenced by The Merck Manual of Diagnosis and Therapy, for reasons of record set forth in the Office Action mailed 10-18-04.

It is noted the claims have been amended to include detecting bronchial asthma.

It is well recognized that allergic reactions of the lung cause bronchial asthma (see The Merck Manual of Diagnosis and Therapy). Torii et al., teaches detecting MMP's in ARDS that have had allergic reactions in the lungs (see Table 1, in particular). Since the detection of ARDS in patients that had allergic lung reactions would be encompassed by the recited phrase "bronchial asthma", the claimed invention is anticipated.
